## News...

Happy June! Although our year draws to a close, the month ahead is still full of fun and learning! We are anxiously awaiting the arrival of our baby chicks and emerging butterflies, and as we wait, we will explore matter, force and motion, and benchmarks to 10 and will continue to investigate various kinds of mapping. We will celebrate our year together with a 10-day countdown. For each of the last 10 days of school (roughly), we will pop a balloon to reveal a fun activity. This means you may get short notice about the next day's theme, however, there won't be any major preparations necessary for any of our activities. Thank-you for letting me know when your child is going to be away, it does help with planning our final month. Our final sharing theme will be "Anything Goes!" Sharing bags will be sent home later this week. It has been a privilege to be a part of your child's learning this year. Thank you for all you have done to support your child's learning at home! It has been a wonderful year and I wish you all a healthy and happy summer!

**Mrs. Ferris**

## Important Dates

## This month's focus

Force and Motion

Matter

Life Cycles

## Reminders

- Please return all library books by June 9.
- Please let me know if you have any questions or concerns.
- Thanks for sending blue bags back each week!

## At home...

Ask your child about the life cycle of a butterfly. Can they tell you about the 4 stages? Can they tell you 2 interesting facts?

## A look at what's next...

This month our sharing theme will be, "Anything Goes!" Students are welcome to bring in any interesting item from home that can fit in the sharing bag. Please do not send toys. Students are encouraged to give 3 clues so we can guess what they have brought.
